Shows That You Don't Clean Them-Note These Facts

All Statements Approved by High Dental Authorities

This is to men and women who find that brushed teeth discolor and decay. Who find that tartar forms, or pyorrhea starts. You are not keeping teeth clean. You let a film remain and the damage is traced to it.

Dental science has found a way to end film. It is now embodied in a dainty tooth paste which millions are employing. We urge you to try it ten days at our cost and see the results for yourself.

> That Film on Teeth Can Now Be Ended in This Way

You can feel on your teeth a slimy film, ever-present, ever-forming. That film is the great tooth wrecker. Dental science now traces nearly all tooth troubles to it.

The film clings to the teeth, gets between the teeth, enters crevices and stays. The tooth brush does not end it. The ordinary dentifrice does not dissolve it. So millions find that teeth discolor and decay despite the daily breaking.

Why Teeth Discolor

That film is what discolors - not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

Dental science; after years of searching, has found a way to combat film. Many able authorities have proved its efficiency. For five years it has been subjected to every sort of clinical and laboratory test.

Now, for home use, it is embodied in a dentifrice called Pepsodent. Leading dentists all over America are now urging its adoption. This week we offer a 10-Day Tube to anyone who asks. And we urge that someone in every home prove its unique

Based on Pepsin

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it.

Pepsin long seemed impossible. It must be activated, and the usual agent is an acid harmful to the teeth. Dental science has now discovered a harmless activating method. And now everyone can fight the film with active pepsin constantly.

See What It Does

Present the coupon for a 10-Day Tube. Use like any tooth paste. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears.

Watch the results and read the reason for them. Compare this new method with the old. Then adopt for yourself and have your children adopt the method which seems best. This is of lifetime importance to you. Cut out the coupon so you won't forget.

Look Now

is a way to cleaner, safer teeth.

Look in Ten Days See how the teeth whiten - how they glisten - as the fixed film disappears. Then you will know there

The New-Day Dentifrice A scientific film combatant, certified by high authorities and

now urged for daily use by leading dentists ever where.
